

Migrate

More efficiently and securely

Migration can be an uncomfortable journey of delays, unplanned expenditure and valuable resource tied up. Poorly planned, it compromises the speed of business transformation. And it can fail to preserve the chain-of-custody that's so critical to regulatory compliance.

bluesource helps businesses move email and archive data to new applications, the cloud or storage platforms. Trusted and proven in highly regulated sectors, we ensure predictability, certainty and secure data. Our migration services and support scale as businesses answer the big questions of growing information: what to keep, what to protect, where to store and how to manage it.

Services

- Messaging migrations
- Maintaining chain-of-custody
- Moving to the cloud
- Trusted and proven methodology:
 - Health Check
 - Pilot Migration
 - Project Planning
 - Managed migration

Benefits

- Projects stay on-schedule and on-budget as unexpected costs have been avoided
- Accurate understanding of the complexities and time scales for migrating data
- Free up resource by utilizing dedicated migration and project management expertise
- Meet regulatory demands and ensure chain of custody is preserved as data is handled securely
- Benefit from advanced third party tools, only available to trusted migration specialists
- Plan large-scale movement of data to the cloud in accordance with bandwidth and compliance

Our solutions and capabilities

Messaging migrations

- Managed migration services for moving production and archived email to the cloud, or to enable changes in application and storage platform
- A full service to manage extraction, transfer and ingestion of data to the new platform or application, across a wide range of sources and targets
- Full accreditations to use specialised 3rd party tools that deliver methodical, intelligent and time-efficient migrations

Maintaining chain of custody

- Unbroken chain of custody during migration, enabling regulated businesses to stay compliant
- eDiscovery and disclosure of archived data that's legally defensible in court
- Comprehensive reports showing the audit trail of all migrated items from archives and journals

Moving to the cloud

- Remove complexities of moving to popular cloud platforms like Office 365 and Veritas.cloud so data reaches its destination securely and efficiently
- Continuity of business, ensuring a seamless user experience and maximum employee productivity during migration
- Full logistics management of transferring data to cloud providers in line with timescales, data volume, available bandwidth and all compliance requirements

Trusted and proven methodology

- A proven process incorporating the demands of highly regulated organizations:
- Health check: of the suitability of the source and target applications
- Pilot migration: prove the suitability of the tools, assess data throughput, and accurately predict project duration
- Project planning: to minimize the business impacts of the migration schedule
- Production: where our dedicated team manages every aspect of the migration
