

Protect Productivity, profitability and IP

The new information age is increasing data and with it the challenges of fast and efficient recovery from data loss. Not checked, the effect on business productivity, reputation and the corporate bottom line can be profound.

bluesource doesn't just protect business information, but operational resilience – and we minimize downtime when files, servers or storage need to be restored. So in the event of failed infrastructure, major disruption or simply lost data, the recovery times are swift and costs are minimized.

Services

- Backup strategy and planning
- Backup audits and troubleshooting
- Technical design and implementation
- Backup managed services
- Backup 24/7 cloud protection
- Backup appliances
- Disk, tape and cloud storage

Benefits

- Optimize data protection for expanding IT environments and stricter compliance requirements
- Minimize loss of productivity by accelerating the recovery of backed up data
- Deliver a more economical solution to retaining backup data, and relieve the upward pressure on storage costs
- Avoid missing back up windows, and the risk of unprotected information as data growth accelerates
- Better secure valuable corporate data and IP on the increasing number of endpoint devices

Technologies

- **Software:**
 - Veritas NetBackup
 - Veritas Backup Exec
 - EVault
- **Hardware:**
 - Veritas NetBackup Appliance
 - Veritas Backup Exec Appliance
 - HDS Tape Solutions

Our solutions and capabilities

We offer comprehensive backup solutions delivered by experts and optimized with the leading disk, cloud and tape technologies. We optimize the right technology to protect and recover information on-premises, in the cloud or hybrid. Additionally we provide a fully managed services capability, releasing valuable IT skill and budget.

Backup strategy and planning

- Realise Recovery Time and Recovery Point objectives in the most appropriate and cost-efficient manner
- Appropriate data protection advice for organizations of all sizes, from SMB through to Enterprise
- Extensive backup expertise in archiving, cloud hosting and document management

Backup audits and troubleshooting

- Designed to assist customers suffering with poorly optimized backup solutions
- Root-cause analysis and process audit, identifies undiagnosed backup and recovery bottlenecks
- Detailed health-check reports and priority-based recommendations help businesses resolve issues

Technical design and implementation

- Data protection and backup specialists design, deployment-plan and implement all solutions
- Utilize the most appropriate backup technology, and leverage new innovations for long-term suitability
- Strategic use of backup appliances, disk, tape and cloud to consolidate and simplify infrastructure
- Optimal backup and faster recovery times, through de-duplication, replication, virtual machine recovery and backup acceleration

Backup Managed Services

- On-premise backup solutions, fully optimized and monitored 24/7 by dedicated specialists
- Bespoke diagnostics provides deep insight into the health of backup environments
- Experienced support analysts and engineers collaborate on problem diagnosis and resolution
- Predictable monthly costs
- Monthly service reports

Backup 247 Cloud Protection

- Fully featured cloud backup for tape-free data protection
- Monthly, per GB pricing gives total flexibility and predictability without major upfront Capex
- Freedom from patching, upgrades, hardware refreshes and capacity
- Protected data is de-duplicated, secured, encrypted and readily available for self-service or assisted recovery
